

Kaito Kikuchi

Computational Biology & AI Scientist

PERSONAL INFO

📍 San Diego, California, USA
✉ kyetokikuchi@gmail.com
🌐 linkedin.com/in/kaitokikuchi/

TECHNICAL SKILLS

- **Python:** Proficient in the data science stack including Pandas, NumPy, SciPy, Scikit-learn, Matplotlib, Streamlit
- **ML/AI:** Experienced in Pytorch, MLOps with Valohai, CNNs, clustering, LLMs
- **Image Analysis:** ImageJ/FIJI, OpenCV, QuPath
- **Biological data:** Confocal & fluorescence 2D/3D microscopy, histopathology whole slide images, protein-protein interaction networks, metabolic time-series data, Neuropixel activity readings, DNA/RNA sequences
- **Other:** Linux/UNIX, Google Cloud Platform (GCP), Clojure, Julia, R, MATLAB

VOLUNTEERING

- **UJA, Inc:** Advocation group for overseas Japanese researchers. Currently serving as the the translational research working group chair. Organized monthly online seminars, participated in fundraising, and chaired panel discussions.

LANGUAGES

- **English:** Native fluency
- **Japanese:** Native fluency
- **German:** Elementary

INTERESTS

Pottery/Cooking/Biking/Baking/Kintsugi

WORK EXPERIENCES

- **Manager, Computational Biology**
Reveal Biosciences, USA
Aug 2023 - Present
 - Leading the computational biology/image analysis team with 5 direct reports.
 - Developed automated analysis pipelines and train machine learning models for digital pathology.
 - Built an internal data QC webapp in Python for outlier detection and data visualization.
- **Image Analysis Scientist**
Sep 2022 - Aug 2023
 - Conducted comprehensive data analysis for product verification.
 - Acting as the technical expert on AI pipeline development within the company.
 - Serving as the product owner of flagship WSI viewer software, imageDX.
- **Graduate Research Assistant**
University of California San Diego, USA
Sep 2016 - Jun 2022
 - Investigated how bacterial spores use electrochemical charges to return to life by combining molecular genetics, single-cell imaging, microfluidics, and data science.
 - Designed experimental methods for imaging spore germination within a microfluidics device.
 - Analyzed image data by stabilize image drift, tracking spores, and extracting image features.
 - Performed data analysis in Python, including data parsing, time series analysis, statistical validations, and publication-ready data visualizations.
- **Research Assistant**
Systems Biology Institute, Japan
Apr 2013 - Aug 2016
 - Participated in bioinformatics projects aiming to locate drug-targets from protein-protein interaction (PPI) networks.
 - Developed a novel network mining method by sequentially applying clustering algorithms.
 - Applied clustering technique to MRSA, refining the module analysis step to use an ensemble voting method with 10 classification algorithms to predict drug targets.

EDUCATION

- **University of California San Diego**
Sep 2016 - Jul 2022
Ph.D. Biology with specialization in quantitative biology
- **University of Tokyo**
Apr 2014 - Mar 2016
M.A. Biophysics with a focus in single-cell live imaging
- **International Christian University**
Apr 2010 - Mar 2014
B.A. Biology with a focus in microbial genetics and DNA repair
